

Game crashes and unable to join

If you are experiencing issues please check that you are on the latest version. Kian is a donut and updates the modpack often so there's a good chance there's a newer version.

If you are still unable to join and you are using the modrinth launcher, try to reinstall the modpack, modrinth has been a bit buggy and sometimes doesn't update your instance properly.

If you are still having any issues, open a ticket in the discord and we would be happy to help!
